

## For AAO Entry

- Please browse to <http://agrisnetodisha.ori.nic.in/>.
- There is a link to E-pest Surveillance .Please go to that Page.

- There is a login link .Please visit that Link.

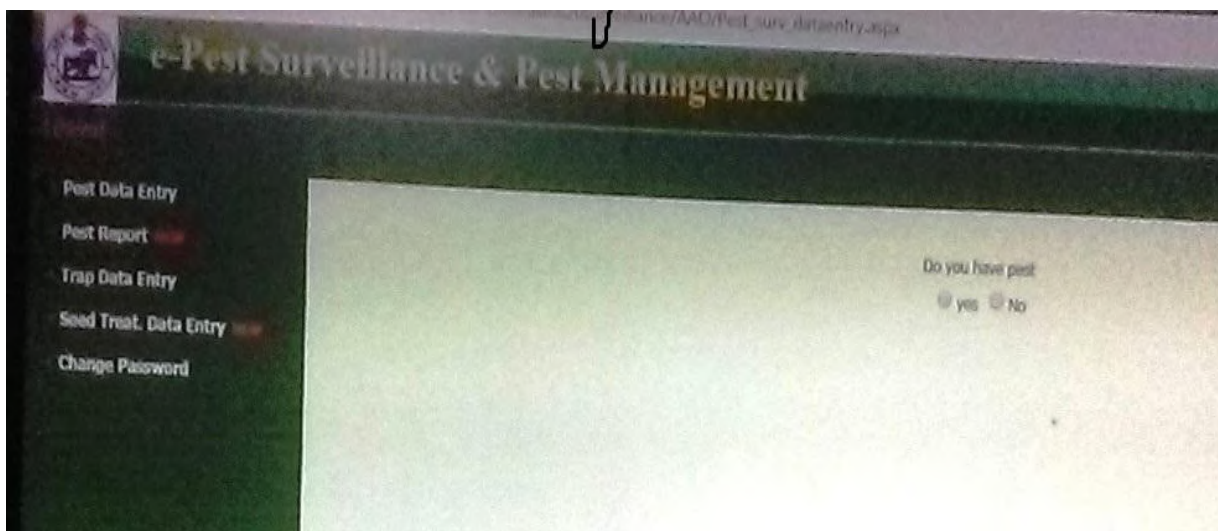

Please enter your user id and password which is being used by Farm Mechanization. Upon successful login you will be directed to AAO home page.

In the AAO page 5 sub head are attached.

(Pest data Entry, Pest Report, Trap data Entry, Seed Treat Data Entry, Change Password)

On clicking Pest data entry a page will show as

1- If in your Block pest present then Click **Yes** bottom , if no pest then click **No** bottom

2-On clicking **Yes bottom** it shows the data sheet page. Step by step enter the data as

**1- Location Information**:- You have to enter location details as per details below

The screenshot shows a form titled "Location Information" with the following fields and values:

- Block : Tihidi
- Gram-Panchayat : Bhatapada
- Village : Bhatapada
- Latitude: [Redacted]
- Longitude: [Redacted]
- Phone No: 9437214567, 7504001234

(Ph no. will be separated by commas (,))

**2-Crop Information**:- After completion of Location Information you have to fillup crop information

The screenshot shows a form titled "Crop Information" with the following fields and values:

- Date of Entry : 25.10.2018
- Season :  Kharip  Rabi
- Crop Category : Cereals / Pulses / Oilseeds / Sugarcane / Fibre crops
- Crop Name : Paddy
- Crop Stage : --Select--

Crop Category shall be selected from the list. As per Crop category the Crop name to be selected from the list. Also select Crop stage from the list.

### 3-Pest or Disease Information:-

You have to select Pest / Disease name from the list. As per the data sheet the total area affected is entered up to 1 digit after point. The Total area affected shall be equal to the addition of Higher intensity, Moderate Intensity & Lower intensity. When the pest or disease is below ETL then reflect the figure in Lower intensity. Basing on intensity of attack above ETL the affected area shall be entered in Higher & Moderate Intensity.

**Pest or Disease Information**

(priority on high and Mod will be Treated)

Pest/Disease Name:

Total Area Affected (in Ha.):  (Only 1 digit after point(.), will be accepted)

**Intensity of Attack**

Higher Intensity (3) in Ha.:	<input type="text" value="2.4"/>	(Only 1 digit after point(.), will be accepted)
Moderate Intensity (2) in Ha.:	<input type="text" value="4.6"/>	(Only 1 digit after point(.), will be accepted)
Lower Intensity (1) in Ha.:	<input type="text" value="5.0"/>	
Total Area Treated(In Ha.):*	<input type="text" value="6.4"/>	
High Intensity Area Treated(In Ha.):*	<input type="text" value="2.4"/>	
Mod Intensity Area Treated(In Ha.):*	<input type="text" value="4.0"/>	
Low Intensity Area Treated(In Ha.):*	<input type="text" value="0"/>	

Then entered the total area treated out of the affected area in ha only 1 digit after point. The Total area treated shall be equal to the addition of Higher intensity, Moderate Intensity & Lower intensity treated. Higher intensity area treated shall be from the higher intensity area affected. So like Moderate and Lower intensity treated area shall be from Moderate & Lower intensity affected area. As per IPM principle pesticide shall be advised only when pest cross ETL.

**4-Pest population /Nature of Damage**:- The information selected from the list.

Pest Population or Damage Intensity

Moderate : ▼  
High: ▼

Submit Reset

Developed By National Informatics Centre, Bhubaneswar, Odisha
